ABSTRACT

This 31st annual report of tuition and fees at public institutions in the 50 states compiled by the Washington State Higher Education Coordinating Board (HECB) examines tuition and fees at Washington State institutions compared to national averages. Generally, Washington institutions of higher education charge fees that: (1) are less than the national average for resident undergraduate tuition and fees; (2) are substantially more than the national average for resident and nonresident graduate tuition and fees at research and comprehensive universities; and (3) are substantially more for nonresident undergraduate tuition and fees at comprehensive universities and community colleges. Three appendixes comprise the bulk of this report. The first discusses the national peer comparison groups used as benchmarks for Washington institutions and provides tables displaying the relationship of tuition and fees at Washington institutions to those of their respective peer groups for the years 1995-96 to 1999-2000. It also includes data on full-time tuition and fees for the first professional degree programs of medicine, dentistry, and veterinary medicine at the University of Washington and Washington State University compared to their respective peer groups. Appendix 2 contains an overview of Washington State tuition and fee policies and legislation since 1997; appendix 3 lists four-year colleges and universities participating in the survey. (SM)

1999-2000 TUITION AND FEE RATES

A National Comparison

Overview

The following two tables provide an overview of the relationship of tuition and fee rates at Washington institutions to national averages. Generally,

- Washington's institutions of higher education charge less than the national average for:
  - Resident undergraduate tuition and fees
- Washington's colleges and universities charge substantially more than the national average for:
  - Resident and nonresident graduate tuition and fees at research and comprehensive universities
  - Nonresident undergraduate tuition and fees at the comprehensive universities and community colleges

Peer Comparisons

Comparisons of tuition and fee rates at Washington institutions compared to their respective peer groups are displayed on the table on the following page. Generally,

- Washington four-year institutions' tuition and fees are less than their respective peer averages for:
  - Resident undergraduate rates at all Washington colleges and universities.
    The Evergreen State College demonstrates the largest variance from the peer average (-24.2%).
  - Nonresident undergraduate rates at Washington research universities.
    Research universities are less than the average of their peers by approximately 3.5%.

- Washington universities' rates exceed their respective peer averages for:
  - Resident and nonresident graduate tuition and fees at all Washington universities and college.
    Washington comprehensive institutions substantially exceed their peer average (+67.8%) for nonresident graduates.
  - Nonresident undergraduate tuition and fees at Washington's comprehensive institutions and community colleges.

Methods

This is the 31st annual report of tuition and fee rates at public institutions in the 50 states. All data contained in this report were compiled using Washington Higher Education Coordinating Board surveys of state agencies or individual institutions. Board staff greatly appreciate the continued cooperation and assistance provided by the many respondents to these surveys. Their continued efforts to provide accurate and timely data have helped make these reports source documents for many states in the development of their own tuition and fee analyses and presentations to governing boards and legislatures.

With each annual survey, respondents have an opportunity to review and revise previously reported data. Though small in number, such revisions modestly affect the national averages from those displayed in earlier reports. Revisions may reflect a mid-year surcharge, discontinuation of a nonresident differential, or an adjustment in incidental fees.

In addition, for the 1999-2000 report, we have made significant changes to the processing of the tuition and fee data. The most current six years of data (AY1994-1995 through 1999-2000) have now been entered in a data base which we make available upon request. Early next year, we hope to be able to offer users the ability to access the data directly from our web site.

Some respondents may note that minor adjustments have been made to prior-year data in addition to those that you submitted. This was likely caused by the complete re-entering and verification of the last six years of survey data, as well as verified calculations and changes in rounding of percentages. Please let us know if you have any questions or concerns related to your reported data.

Tables 1 through 10 on the following pages provide a national perspective on tuition and fee rates and increases over the most recent five years. Tables 1 through 8 display historical and current academic year tuition and required fee rates for full-time resident and nonresident undergraduate and graduate students at public four-year colleges and universities. Tables 9 and 10 display state averages for community colleges in each state. Each table also shows Washington State's ranking nationally. Tables also provide the one- and four-year percentage increases for each state.

Compilation of averages has been consistent over time and has dealt with the "university of" each state and state averages of those public colleges and universities reported since 1968-69 in these annual Board reports. Data on the state colleges and universities represent the average undergraduate charges at 215 state public institutions and the average graduate charges at 195 of those that offer graduate programs. Although not all public institutions are included in this survey, the averages and changes over time at the same set of institutions offer consistency and the large number of institutions included provides a close approximation to state averages.

Users of the report should note that, for reporting comparability, 45 quarter hours or 30 semester hours were used as the basis for full-time undergraduate students. Full-time graduate students were based on 30 quarter hours or 20 semester hours.

Appendix A discusses the national peer groups used as benchmarks for Washington institutions and provides tables displaying the relationship of tuition and fee rates at Washington institutions to those of their respective peer groups. It also includes data on full-time tuition and fee charges for the first professional degree programs of medicine, dentistry, and veterinary medicine at the University of Washington and Washington State University compared to their respective peer groups.

Appendix B contains an overview of Washington tuition and fee policies and legislation since 1977.

Appendix C is a listing of four-year colleges and universities included in the survey.

APPENDIX A

PEER COMPARISON GROUPS

PEER COMPARISON GROUPS

The development and use of peer institution comparison groups is a subject familiar to most institutions and state coordinating and governing boards. Washington higher education, legislative, and executive staff have twice studied the role and selection of peer institutions in recent years. In 1988, the Higher Education Coordinating Board undertook a study to develop peer groups reflecting a national perspective. Concurrently, a special joint legislative and executive study group was appointed to review the higher education master plan funding recommendations, with peer comparison groups identified as one of its areas of study. The Joint Study Group and the Board worked together and adopted the following peer policies:

1. The Carnegie Commission's classification of institutions is used as the basis for selecting comparison groups for Washington institutions of higher education.

2. The national comparison group for the University of Washington is all public institutions in the Carnegie classification Research Universities category 1 with medical schools.

3. The national comparison group for Washington State University is all public land grant universities in the Carnegie classification Research Universities categories 1 and 2 with veterinary schools.

4. The national comparison group for Central, Eastern, and Western Washington Universities is all public institutions in the Carnegie classification Comprehensive Colleges and Universities category 1.

5. The national comparison group for the Washington community college system is all state community college systems.

A peer group for The Evergreen State College was adopted by the Higher Education Coordinating Board in 1990 using the Carnegie Commission classification of institutions. A composite category of public institutions in the Comprehensive I and Liberal Arts II classification was screened. Institutions were selected based on size, similarities of degrees awarded, and other characteristics common to The Evergreen State College.

A summary of Washington tuition and fee rates compared with those at peer institutions is shown on page 3. Detailed tables follow this narrative.

Although these groups, as herein defined, are not used in the development of Washington's tuition and fee policy, data on the adopted peer groups for the University of Washington and Washington State University are displayed in Tables A1 through A8, respectively, as a resource for interested persons. Tables A9 through A14 display the tuition and fee charges for the first professional degree programs of medicine, dentistry, and veterinary medicine for the same institutions.

Data on the 215 state colleges and universities contained in Tables 5 through 8 provide a reasonable perspective on the national group selected for comparison with Central, Eastern, and Western Washington Universities. Similarly, Tables 9 and 10 represent the national group selected for the Washington Community College System.

Data for The Evergreen State College peer group are reported in Tables A15 through A18.

APPENDIX B

WASHINGTON STATE
TUITION AND FEE POLICIES

WASHINGTON STATE TUITION AND FEE POLICIES

In 1977, the Washington State Legislature amended the tuition and fee statutes to relate the tuition and fee rates to fixed percentages of calculated cost of education. Percentages established were to be used to calculate recommendations and were not binding on future legislatures. The increases recommended for the 1977-79 biennium were adopted by statute and phased in over two years on a 75/25 percent basis; tuition and fees would equal 25 percent of the calculated cost of education.

The Legislature chose to not increase tuition and fees in 1979, but in 1981 increased the percentages of costs to be paid by students. At that time it adopted an automatic adjustment feature, and again phased in the increases on a 75/25 basis. Additional increases in some tuition and fee categories were made by the Legislature in 1982. The 1981 and 1982 legislation also provided that increases in tuition and fees would be made biennially based on the education cost of the previous biennium. Since the legislation had no provision to phase in adjustments, the 1983 and 1985 increases took effect in the first year of each biennium.

Legislation passed in 1986 required that tuition and fees be established biennially and provided for annual adjustments beginning with the 1987-88 academic year. The legislation also required that the transition from the biennial tuition adjustment to annual adjustments not result in reduced revenue to the state general fund.

In establishing the 1989-91 tuition and fee rates, the Legislature rejected the use of those costs not developed through a faculty activity analysis and required that institutions not already doing so would conduct such an analysis for the 1989-90 Education Cost Study.

Education Cost Studies conducted since 1989-90 were completed using a faculty activity analysis for all institutions as required by the Legislature. The 1989-90 study results were used to establish the tuition and fee rates for the 1991-93 and 1993-95 biennia.

From 1981 until 1993, tuition rates reflected the proportion of education cost as indicated in the first column of the following table. The second and third columns depict the proportion of education costs on which tuition and fees were based for academic years 1994 and 1995.

The most recent Education Cost Study was completed by the Board using 1997-98 data. Under 1998 law, this study provided a direct link between the cost of education at Washington institutions and the tuition and fees paid by students at those institutions. This study is used to determine cost distribution ratios for each institution. These relationships then provide the basis for determining the educational cost on which subsequent tuition and fee levels may reasonably be calculated.

(A) Professional rates (Medicine, Dentistry, and Veterinary Medicine) are calculated at 167 percent of the resident and nonresident graduate rate.

Tuition increases for 1995-96, 1996-97, and 1998-99 were not based on a specified proportion of cost, but were set at 4 percent per year. Nonresident undergraduate rates at the research institutions were increased an additional ten percent for the 1995-97 biennium.

For the 1997-99 biennium, tuition increased 4 percent per academic year for most categories of students. Exceptions were allowed for increases in three student sectors at the University of Washington: 8.3 percent for nonresident undergraduates, 7.3 percent for resident law students, and 6.7 percent for non-resident law students. This was the first time that separate tuition rates were recognized for law students; in prior years, law students paid the same tuition as graduate students. The University of Washington was directed to use 10 percent of the revenue from the difference between a 4 percent increase and the actual increase to help needy resident undergraduate students and needy resident law students. Tuition and fee rates for law students are not reflected in this publication.

Washington institutions were authorized to increase all tuition components up to 4.6 percent for 1999-2000. All but two institutions elected to raise tuition to the maximum limit for resident undergraduates – Washington State University and Eastern Washington University,

which held their increases to 4 percent and 3 percent, respectively. Resident graduate tuition increases were raised the maximum 4.6 percent at three institutions: Central Washington University, The Evergreen State College, and Western Washington University. The University of Washington, Washington State University and Eastern Washington University held theirs at 3 percent.

The community colleges raised both resident and nonresident rates the maximum 4.6 percent.

In 1996, the Legislature granted the four-year universities and The Evergreen State College, with the approval of their respective student government associations, authority to establish a technology fee in addition to tuition and fees. The fee was limited to $120 per year for a full-time student. For the 1999-2000 academic year, the following four-year institutions have initiated mandatory technology fees as indicated:

University of Washington	$120
Central Washington University	$ 75
Eastern Washington University	$ 36
Western Washington University	$ 30

Because these are mandatory charges, they are included in the tuition and fees reported for Washington institutions in this report. Washington State University and The Evergreen State College have not assessed a technology fee.
